**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

The fiber connections we all should have had last decade were accelerated not through incumbent ISP such as AT&T or Comcast, but through competition such as Google Fiber and even small ISPs like Sonic.net. Despite the fact incumbents want to migrate everyone to cell-based internet infrastructure--the most expensive type of service--I will never submit to their vision.

The internet is vital to 21st-century America since most services that could have been accomplished via face-to-face interaction in the 20th century are no longer possible. Things like finding a job, starting new utility service, POTS and many more in the coming years are now relying on the internet.

Without competitive ISPs, we would be stuck with the most expensive and limited internet packages and we need at least 5 or 6 service providers, not 1, or 2.
